# Import media into Movie maker

▶ *Capture* video clips or pics from digital camera, or *import* from files saved on your computer.
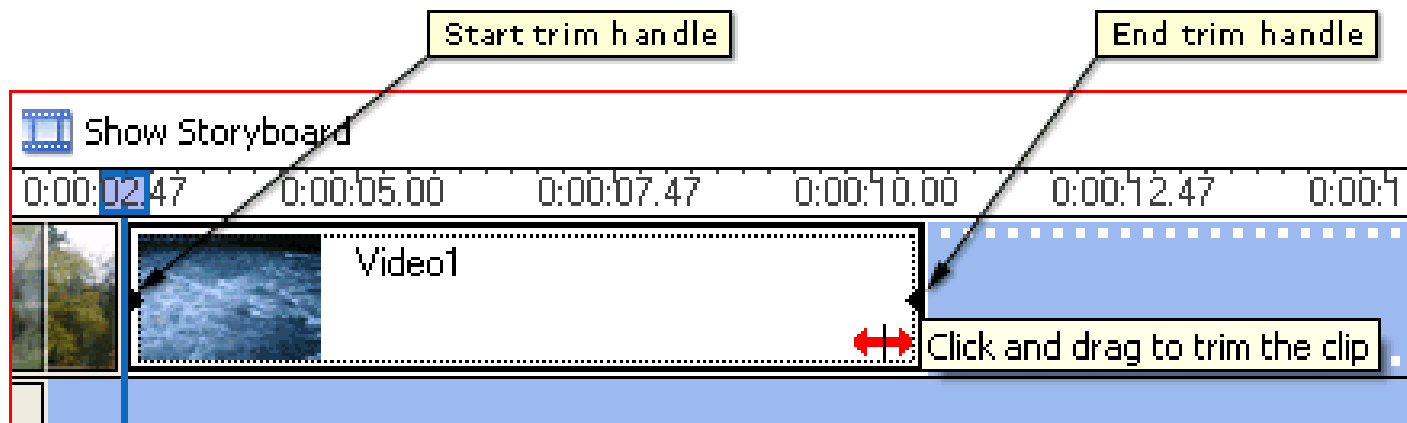

▶ Click on import video/pics

Move video/pics to the timeline

▶ Each item will appear in the collections pane

▶ Drag each item to the story board and drop them in the order you wish them to appear.

Picture time

- ▶ You can also change the length of time that the picture shown in the movie

- ▶ By default each picture will be shown for 5 seconds

- ▶ If you want to change that amount of time drag the "end trim handle" (shown below) notice when you click and drag the amount of time will show in the window.

- ▶ If you are using video you can crop the length of the video using the same process.

Start trim handle

End trim handle

Show Storyboard

0:00:02.47   0:00:05.00   0:00:07.47   0:00:10.00   0:00:12.47   0:00:1

Video1

Click and drag to trim the clip

Preview your movie

▶ You can preview the video at any time by simply clicking the play button at the bottom of the preview screen (or at the top left of the storyboard)

▶ The preview will start where the timeline marker is set… you can drag the marker anywhere you choose by grabbing it at the top

▶ You can also click on the full screen button to see it big

Note: when you preview a movie it may be choppy.

Full screen
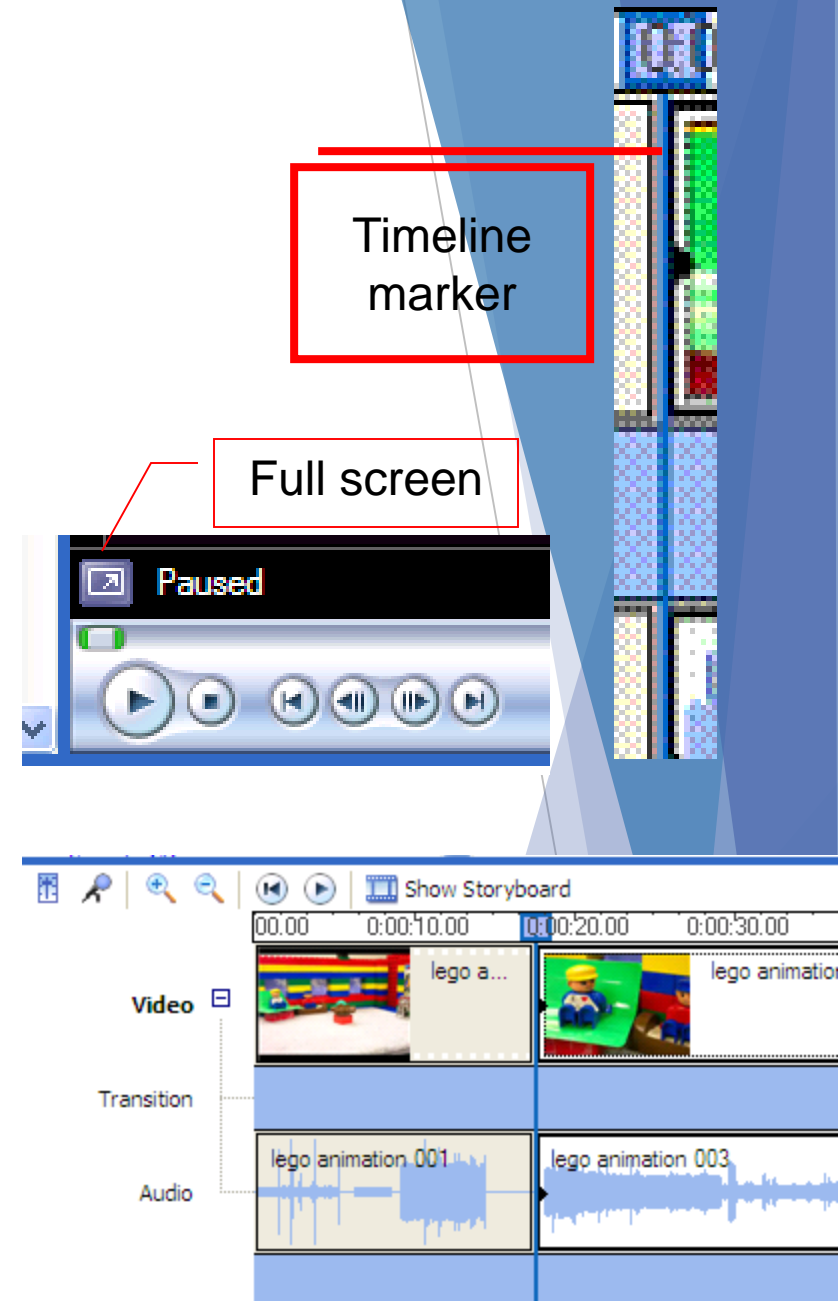

Video effects

▶ You can employ different effects that will jazz up the video.

▶ In the task pane, under step 2, click on "view video effects"

▶ The collection of effects will appear in the collections area

Drag the effects down

▶ Once you have found the effect that is perfect... click and drag it down to the clip in the storyboard

▶ You can use multiple effects on an item
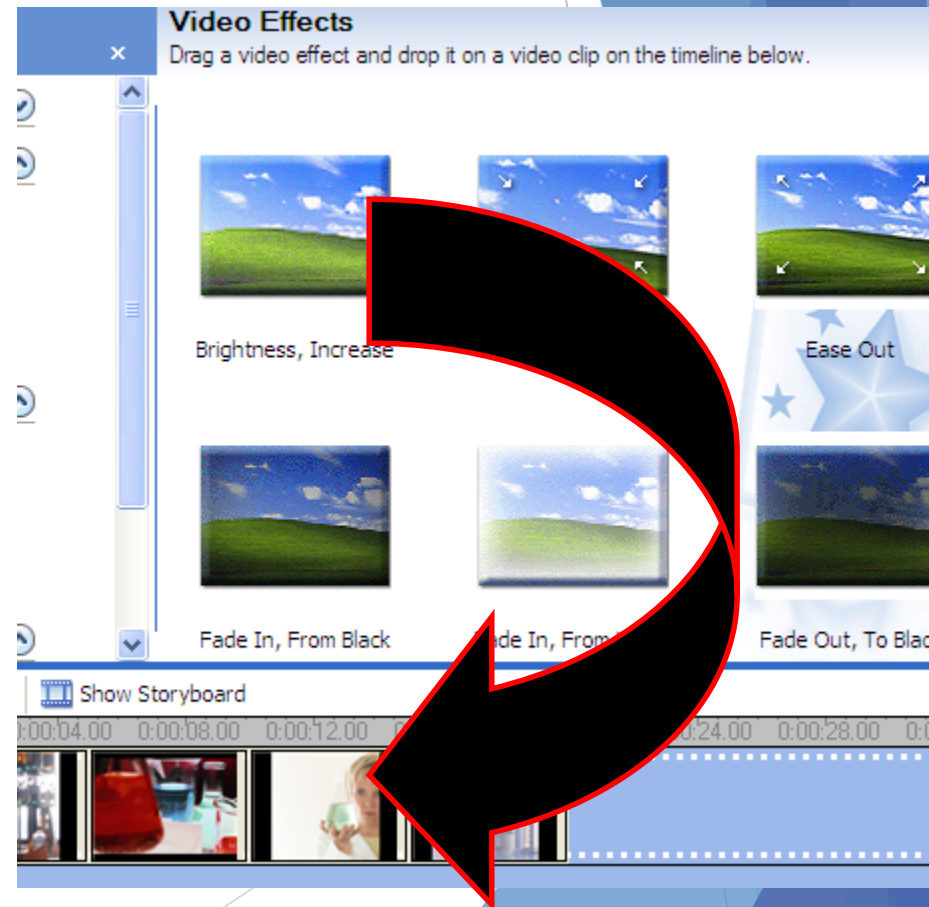

Video effects

▶ You will notice on the picture that a star will appear to represent an effect is on the picture

▶ You will notice that there are 2 overlapping stars on a picture with 2 effects

▶ You can preview the effect on your pictures/video

Full screen

Paused

Transitions

► You can employ different transitions to jazz up the video

► In the task pane, under step 2, click on "view video transitions"

► The collection of transitions will appear in the collections area
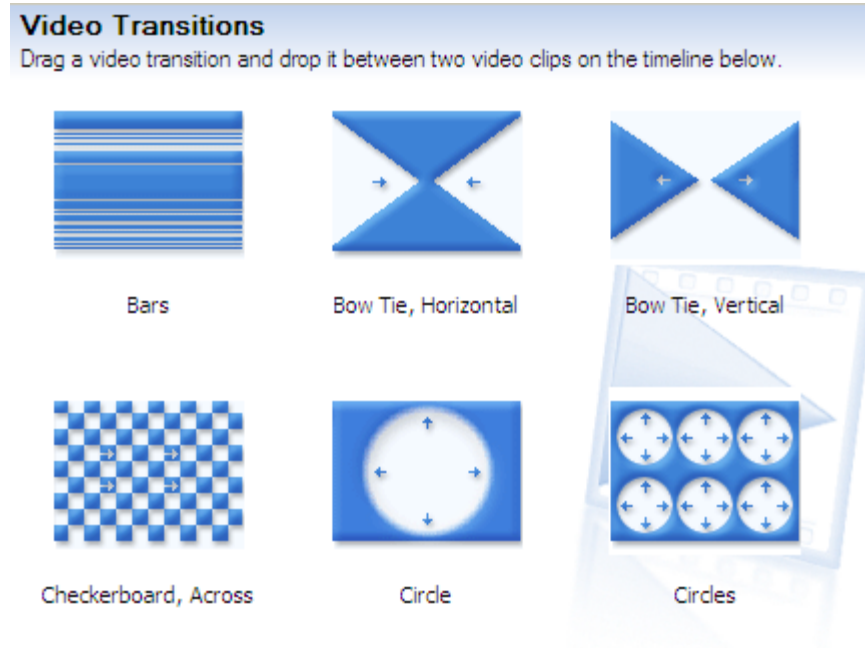

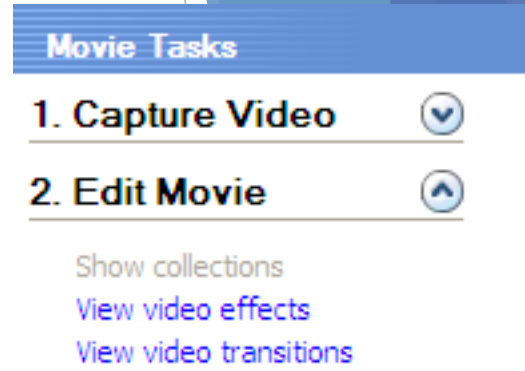

Drag the transitions down

▶ Once you have found the transition that is perfect... click and drag it between the clips in the storyboard.

▶ A blue line will appear to show where the trans will go
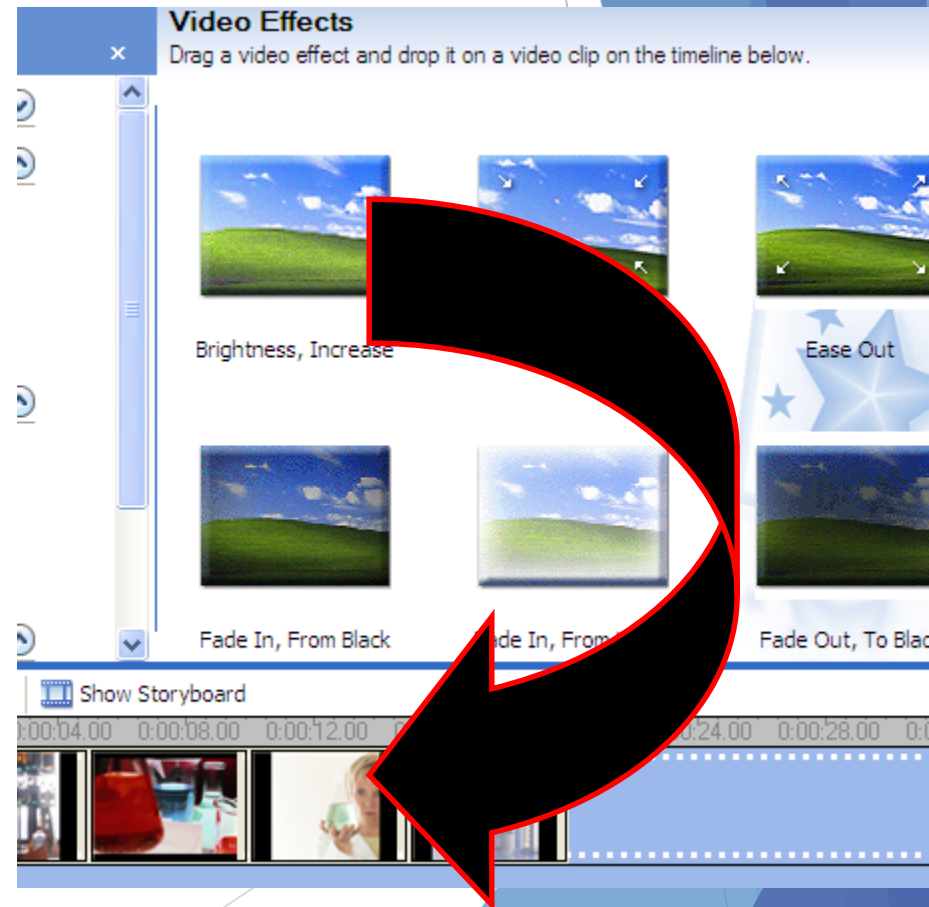

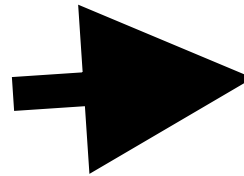

Transitions

- ▶ You will notice that the 2 clips will slightly overlap, and in the track beneath the clips, the name of the trans will appear.

- ▶ Unlike effects, only one transition can be used at a time

- ▶ You can also speed up or slow down a transition by clicking on the picture and sliding it forward or back to increase or decrease the transition's speed

Titles / Credits

▶ Again, in the task pane, under step 2 click on "Make titles…"

▶ This will appear and you can choose where you want to put the title/credits

Movie Tasks

1. **Capture Video**

2. **Edit Movie**

Show collections
View video effects
View video transitions
Make titles or credits
Make an AutoMovie

Add title at the beginning of the movie.

Add title before the selected clip in the timeline.

Add title on the selected clip in the timeline.

Add title after the selected clip in the timeline.

Add credits at the end of the movie.

Cancel

Titles

- Type whatever you want in the text box
- Below, you can change the animation or the font and color
- Once complete, click on Done.

Audio

▶ Add music (mp3, wav, wma) to your movie

▶ In the task pane, click on "import audio…"
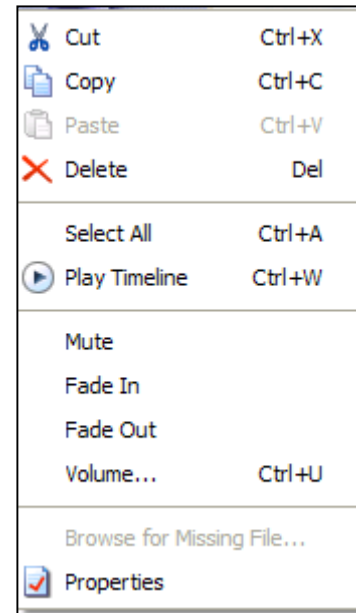

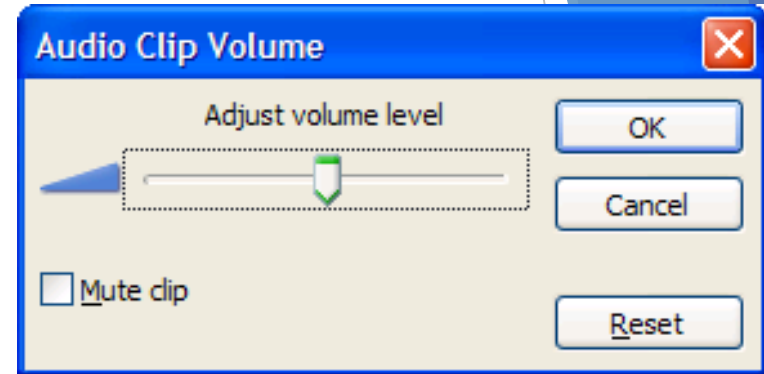

▶ Choose the file(s) you want to use and click "import"

Drag audio down…

▶ In the collections pane, click on the audio file and drag it into the Audio/Music track.

Adjust the audio

► To adjust the volume, push the Control key and U

► Or you can right-click on the track and get this menu which shows volume, fade in and out.

► For video clips, you can mute the recorded sound in the same way

Trim the audio

- ▶ Be sure to make the music the same length as the video.
- ▶ Click on the end of the track and drag it left or right to trim the length.
- ▶ You can add more audio tracks before or after this track
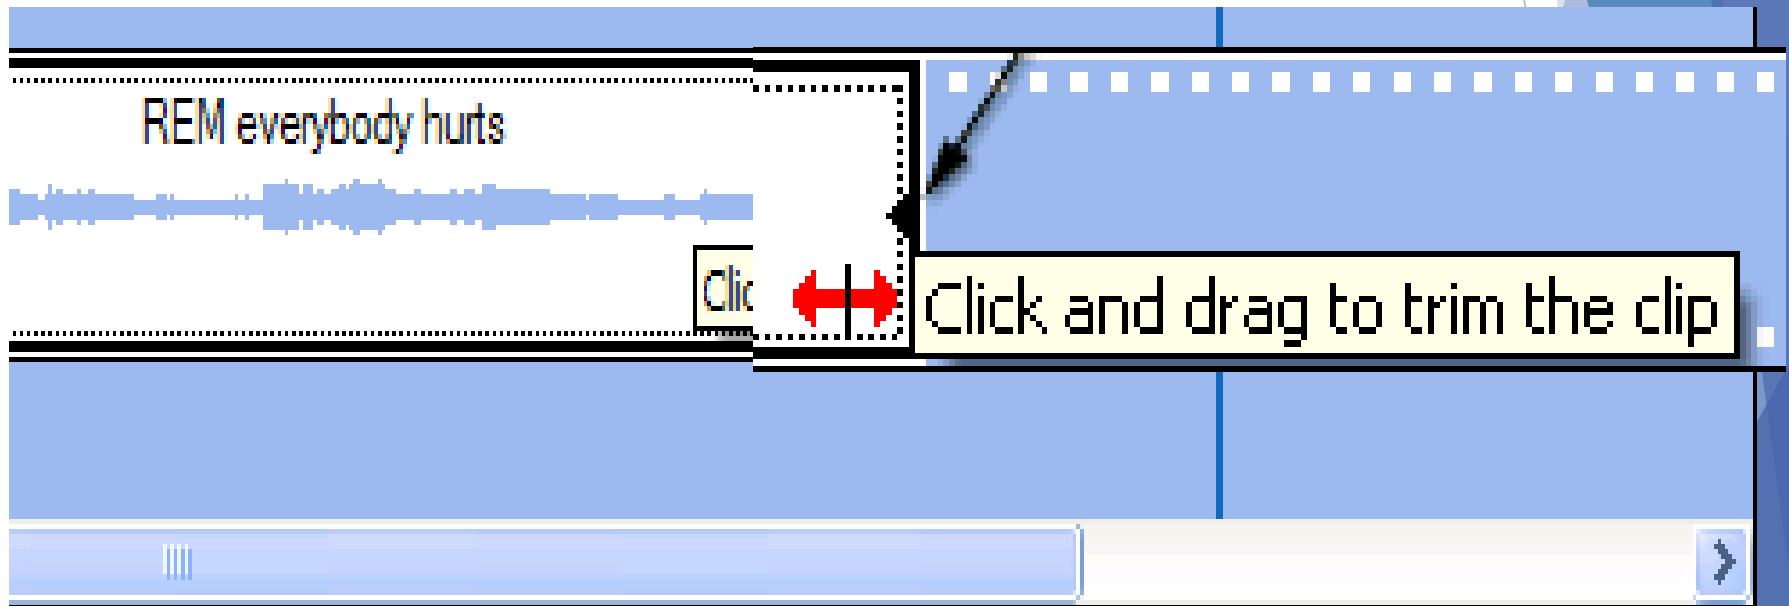

Finish the movie

▶ First go to File-Save to save your project as a Movie Maker File.

This will enable you to go back and make changes, if necessary.

▶ Go to Step 3: Finish Movie. In the Save Movie Wizard box, enter and name and choose where to save.
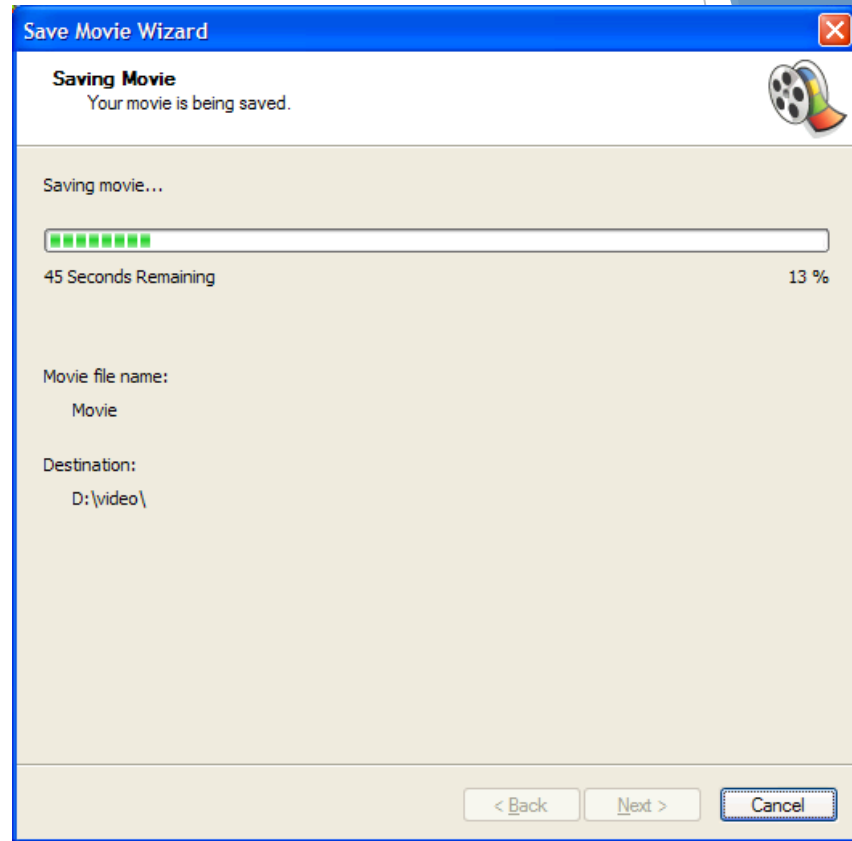

Saving options

► When you save, you have many options based on the quality that you want

► Leave it as "recommended" or click on "show more choices"

Saving

▶ The amount of time that it takes to save depends upon how long it is and the quality options you chose.

▶ The next screen will tell you it is finished and will ask if you want to see your work.

Watching the video

▶ The video is now set to play back in Window media player

▶ If you go to the folder you saved it in and double click it will open and play for you

▶ Then you can burn the file to cd or flash drive to take with you
