

Membuat Navigasi Dalam Aplikasi Chatting

BottomNavBar

```
class _HomeScreenState extends State<HomeScreen> {
  int _currentPage = 0;
  var _image =
    'https://media.salon.com/2013/01/Facebook-no-profile-picture-icon-620x389.jpg';
  @override
  Widget build(BuildContext context) {
    final _pages = <Widget>[
      _firstPage(),
      _secondPage(),
      _thirdPage(),
    ];

    final _bottomNavBarItems = <BottomNavigationBarItem>[
      BottomNavigationBarItem(
        icon: Icon(
          Icons.chat_bubble,
          size: 30.0,
        ), // Icon
        title: SizedBox.shrink(),
      ), // BottomNavigationBarItem
      BottomNavigationBarItem(
        icon: Icon(
          Icons.add_call,
          size: 30.0,
        ), // Icon
        title: SizedBox.shrink(),
      ), // BottomNavigationBarItem
      BottomNavigationBarItem(
        icon: CircleAvatar(
          radius: 15.0,
          backgroundImage: NetworkImage(_image),
        ), // CircleAvatar
        title: SizedBox.shrink(),
      ), // BottomNavigationBarItem
    ]; // <BottomNavigationBarItem>[]
    assert(_pages.length == _bottomNavBarItems.length);

    final bottomNavBar = BottomNavigationBar(
      items: _bottomNavBarItems,
```

```
      currentIndex: _currentPage,
      onTap: (int value) {
        setState(() {
          _currentPage = value;
        });
      },
    );

    return Scaffold(
      appBar: AppBar(
        title: Text("Some Navigations"),
      ), // AppBar
      body: _pages[_currentPage],
      bottomNavigationBar: bottomNavBar,
    ); // Scaffold
  }
}
```

Bottom Sheet

```
class CustomBottomSheet extends StatelessWidget {
  @override
  Widget build(BuildContext context) {
    return FloatingActionButton(
      child: Icon(Icons.add_call),
      onPressed: () => showModalBottomSheet(
        context: context,
        builder: (context) => _buildBottomSheet(context),
      ),
    ); // FloatingActionButton
  }

  Container _buildBottomSheet(BuildContext context) {
    return Container(
      height: 400,
      padding: EdgeInsets.all(8.0),
      decoration: BoxDecoration(
        borderRadius: BorderRadius.circular(48.0),
      ), // BoxDecoration
      child: ListView(
        children: <Widget>[
          ListTile(title: Text('Contoh Bottom Sheet')),
          TextField(
            keyboardType: TextInputType.number,
            decoration: InputDecoration(
              border: OutlineInputBorder(),
              icon: Icon(Icons.phone),
              labelText: 'Masukkan Nomor Telpon',
              prefixText: "+62",
            ), // InputDecoration
          ), // TextField
          SizedBox(height: 24.0),
          Container(
            alignment: Alignment.center,
            child: RaisedButton.icon(
              icon: Icon(Icons.save),
              label: Text('Save and close'),
              onPressed: () => Navigator.pop(context),
            ), // RaisedButton.icon
          ), // Container
        ], // <Widget>[]
      ), // ListView
    ); // Container
  }
}
```
